

Acoustic Engineer (Graduate)

ALLEGRO ACOUSTICS, DUBLIN, REPUBLIC OF IRELAND

Employment basis: €Competitive plus expenses, Gym Membership, Health Insurance, Permanent with 6 month probationary period

Allegro Acoustics is an acoustic design consultancy based in Dublin, Republic of Ireland. We work with leading Architects and Engineers on signature building projects throughout Ireland, United Kingdom, USA, South America and Middle East. Allegro Acoustics is primarily focused on a mix of bespoke design projects and larger capital projects (€20m - €500m).

At the heart of our success lies a young and vibrant team where mutual respect and a progressive approach are fundamental values to our MO! We enjoy our work and never miss an opportunity to have fun along the way! We would welcome someone to join this team who shares these values.

About the Candidate

The successful candidate will have a minimum of a Bachelors Degree in Engineering or a similar and equivalent technical degree, and a keen interest in building design and technical problem solving.

About the Role

This role will typically include the following:

- Acoustic design of spaces to include offices, schools, hotels, residential buildings, music venues, studios, performance spaces and leisure facilities. This will typically include working with 2D and 3D drawings of spaces;
- Environmental noise monitoring and assessment at client sites around the Republic of Ireland and UK;
- Report writing for assessments completed. Excellent report writing skills and attention to detail are essential for this role.
- Input to the design process for construction projects to include drawing mark-ups and report compilation;
- This role will require the successful applicant to hold a full drivers license and have his or her own mode of vehicular transport. Use of one's own private vehicle will be remunerated in line with guidance set out by the Revenue Commissioners relating to Personnel Expenses;
- The successful candidate will receive in-house and external training for all aspects of this role. Allegro Acoustics promotes continued professional development including in-house and external training on a continued basis to enable personnel to reach their full potential as Engineers at all levels.
- Office hours – 9am to 5:30pm Monday to Thursday, finish at 3:30pm on Friday.

This is a client facing role, and hence a professional approach and good communication skills are essential. Candidates who can present themselves well when interacting with clients and colleagues will be considered to be particularly well suited to this role.

If this role is of interest to you, please forward your CV to recruitment@allegroacoustics.ie.
